— The MAILING DATE of this communication appears on the cover sheet with the correspondence address —

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-12 are pending.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because it contains "means" language.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2626

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Okazaki et al (Okazaki) (U.S. 5,745,220).

With respect to claims 1, 3, 4, 5, 7, 8, 9, 11, and 12, Okazaki discloses a print control method comprising receiving order information (column 8, lines 1-5); judging whether a print is a target of automatic printing or manual printing based on the order information (column 7, lines 31-56 and column 11, lines 32-59); issuing a printing instruction to the printing means to carry out printing in the case where the print has been judged to be an automatic printing (column 7, lines 35-40), and suspending the print instruction (displaying the images on the monitor) until a predetermined print instruction has been issued when the print has been judged to be the target of manual printing (column 7, lines 41-56).

With respect to claims 2, 6, and 10, Okazaki discloses the order information is received via a network (column 10, lines 27-37).

7. The prior arts made of record and not relied upon are considered pertinent to applicant's disclosure.

U.S. Patent 4,860,110 is cited as it discloses determining an automatic or manual print mode based on received data.
